The screenshot shows a VS Code editor window with a project structure on the left sidebar. The project structure includes a `__pycache__` directory, a `templates` directory, and an `index.html` file. The `index.html` file is selected and highlighted in orange. The main editor area shows the content of `index.html`, which is a simple HTML page with a `<h1>Hello, World!</h1>` tag. The terminal at the bottom shows the output of the `python app.py` command, indicating that the server is running on `http://127.0.0.1:5000`. The terminal also displays a warning message: `WARNING: This is a development server. Do not use it in production. Use a production WSGI server instead.`
